

Ch. 5 of *Things Fall Apart* Summary

Ch. 5 Summary

Ch. 5 begins with Okonkwo's wife, Nkechi, telling him that she has been talking to the priestess of the Earth goddess, Ala. Nkechi says that the priestess has told her that Okonkwo is a very powerful man.

Okonkwo is very angry with Nkechi for talking to the priestess. He says that he is a powerful man and does not need the priestess's help. He says that he is a man of action and not a man of words.

Okonkwo is very angry with Nkechi for talking to the priestess. He says that he is a powerful man and does not need the priestess's help. He says that he is a man of action and not a man of words.

Okonkwo is very angry with Nkechi for talking to the priestess. He says that he is a powerful man and does not need the priestess's help. He says that he is a man of action and not a man of words.

Okonkwo is very angry with Nkechi for talking to the priestess. He says that he is a powerful man and does not need the priestess's help. He says that he is a man of action and not a man of words.

Okonkwo is very angry with Nkechi for talking to the priestess. He says that he is a powerful man and does not need the priestess's help. He says that he is a man of action and not a man of words.

Okonkwo is very angry with Nkechi for talking to the priestess. He says that he is a powerful man and does not need the priestess's help. He says that he is a man of action and not a man of words.

1. *How do you plan to spend your time during the summer?*
I plan to spend my time working on my research project, which is to study the effects of climate change on the environment. I will also be spending time with my family and friends, and I will be traveling to some of the most beautiful places in the world.

There are two types of *Staphylococcus aureus* (S. aureus).

Staphylococcus aureus is a Gram-positive, spherical bacterium that is often found in the skin and nasal passages of humans and animals. It is a common cause of skin infections, such as boils and abscesses.

The *Staphylococcus aureus* bacterium is also found in the environment, such as in soil and on surfaces. It is a hardy bacterium that can survive for long periods of time.

Staphylococcus aureus is a common cause of skin infections, such as boils and abscesses. It is also a common cause of respiratory infections, such as pneumonia. In some cases, it can cause more serious infections, such as sepsis.
