spontaneous and directed cell-cell interactions with neighboring cells, including the ability to form a "fibrillar network" (Fig. 1B), and the ability to form a "fibrillar network" (Fig. 1B). The fibrillar network is a network of filaments that are formed by the cells, and it is a key feature of the cell-cell interactions. The fibrillar network is a network of filaments that are formed by the cells, and it is a key feature of the cell-cell interactions. The fibrillar network is a network of filaments that are formed by the cells, and it is a key feature of the cell-cell interactions.

The Commission found the proposed 10-year term strategy unhelpful and argued that the Commission should concentrate on the short-term, not general, 10-year strategy as a whole, since the long-term strategy would be unhelpful to the Commission. The Commission also argued that the Commission should concentrate on the short-term, not general, 10-year strategy as a whole, since the long-term strategy would be unhelpful to the Commission.
