

THE STATE OF NEW YORK

IN SENATE

January 1, 1901.

REPORT OF THE COMMISSIONERS OF THE LAND OFFICE, IN ANSWER TO A RESOLUTION PASSED BY THE SENATE, APRIL 1, 1899.

ALBANY:

1901.

Printed by the State Printer, at Albany, New York.

For sale by the State Printer, at Albany, New York, for \$1.00 per copy.

CONTENTS.

The report of the Commissioner of the Land Office, in answer to a resolution passed by the Senate, April 1, 1899, is divided into two parts. The first part contains a general statement of the condition of the land office, and the second part contains a detailed statement of the operations of the land office during the year 1900. The report is divided into four chapters. Chapter I contains a general statement of the condition of the land office, and Chapter II contains a detailed statement of the operations of the land office during the year 1900. Chapter III contains a statement of the operations of the land office during the year 1901, and Chapter IV contains a statement of the operations of the land office during the year 1902.

1. The first step in the process of the project is to identify the scope of the project. This is done by defining the objectives and the deliverables of the project. The next step is to identify the stakeholders who will be involved in the project. This is done by identifying the people who will be affected by the project and who will have an impact on the project. The third step is to identify the resources that will be needed for the project. This is done by identifying the people, equipment, and materials that will be needed for the project. The fourth step is to identify the risks that are associated with the project. This is done by identifying the potential problems that could arise during the project and the steps that can be taken to avoid or minimize these risks. The fifth step is to develop a project plan. This is done by identifying the tasks that need to be completed, the order in which they should be completed, and the resources that will be needed for each task. The sixth step is to implement the project plan. This is done by assigning tasks to team members, monitoring progress, and making adjustments as needed. The seventh step is to close the project. This is done by evaluating the results of the project, identifying lessons learned, and distributing the final deliverables.
