1. What is the purpose of the study? The purpose of the study is to investigate the effect of the independent variable on the dependent variable.

2. What is the independent variable? The independent variable is the variable that is manipulated or changed by the researcher.

3. What is the dependent variable? The dependent variable is the variable that is measured or observed by the researcher. It is the outcome or result of the study.

4. What is the hypothesis?

The hypothesis is a statement that predicts the outcome of the study.

5. What is the significance of the study? The significance of the study is the importance or value of the study. It is the reason why the study is being conducted.

6. What is the conclusion? The conclusion is the final statement or result of the study. It is the answer to the research question.

7. What are the limitations of the study? The limitations of the study are the weaknesses or shortcomings of the study. They are the factors that may affect the results of the study.

8. What are the implications of the study? The implications of the study are the consequences or effects of the study. They are the things that may happen as a result of the study.

9. What are the future directions of the study?

The future directions of the study are the things that may be done in the future.

10. What are the references? The references are the sources of information that were used in the study. They are the books, articles, and other materials that were consulted.

1. What is the purpose of the study? The purpose of the study is to investigate the effect of the independent variable on the dependent variable.
